

USB200

Commercial (Metal Housed) USB Player with Auto-Play, Scheduling & HDMI Output

The TeleDelta USB200 is a metal housed commercially designed USB player designed for high reliability scheduled or 24/7 Signage, Imagery, Audio or Video content playback.

The USB200 is designed for operators who require a simple low maintenance, low support cost Digital Signage solution.

Content is loaded to the USB200 by USB thumb drive and can be copied to the internal 8Gb Memory for storage or played on demand from the USB drive.

The USB200 features auto-restart playback in-case of power outages and operators can schedule start / stop time of playback.

Internal features including scaling, portrait / landscape modes and split screen (multiple content windows) are supported by the USB200.

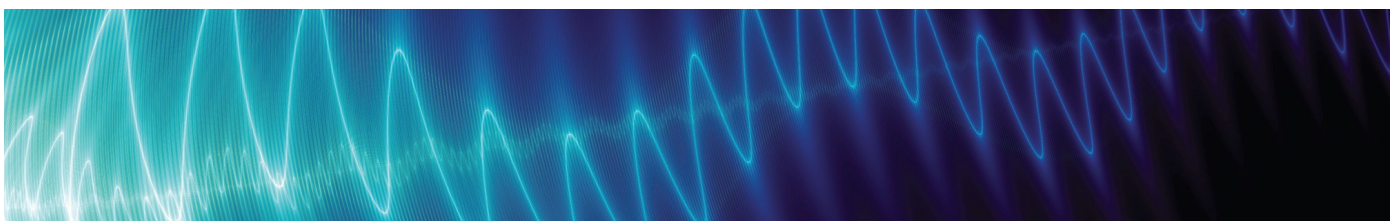

Common Applications

- Retail Digital Signage
- Outdoor / Rugged Environments
- Menu Boards / Displays
